

GAST Laboratory Oil-free Compressor Model XR555-P40-N472NX

Our Product Introduction

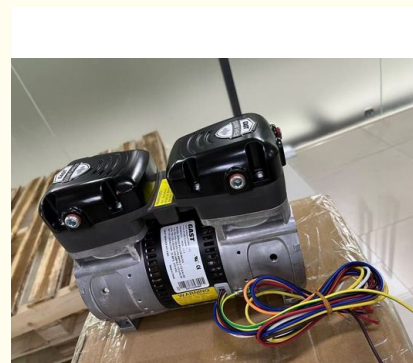

Basic Information

- Place of Origin: CHINA
- Brand Name: GAST
- Certification: CCS CE
- Model Number: XR555-P40-N472NX

Product Specification

- Highlight: Laboratory oil-free compressor, XR555-P40-N472NX oil-free compressor, GAST oil-free compressor

Product Description

GAST oil-free diaphragm air compressor (air compressor/compressor/air pump) from the United States

Brief Introduction

GAST oil-free diaphragm air compressor (air compressor/compressor/air pump) air compressor can provide a small, peaceful positive pressure air source, suitable for some compact applications, with a variety of different voltage/frequency and DC motor models to choose from. In addition, there are models with corrosion-resistant coatings that are used for handling corrosive gases. In addition to the standard single cylinder and dual cylinder designs, some micro designed plastic component structures make the product particularly small in size and lightweight, making it the best choice for portable instruments and corrosion-resistant applications.

Performance range:

The maximum pressure can reach 4.2 kgf/cm², and there are different specifications of flow rates ranging from 0.55 to 92 l/min.

*Laboratory oil-free vacuum pump model DOA-P504-BN

Equipped with: 90W, 220V, 50HZ AC motor

Maximum pressure: 60psi (4.2kg/cm²)

Maximum vacuum degree: -81KPA

No load flow rate: 27L/min (1.6M³/H)

Weight: 6.81KG

Including: pressure gauge, pipe joint, pressure regulating valve, handle, wires, etc

Dimensions: 193x165x271mm (length x width x height)

Laboratory oil-free compressor model XR555-P40-N472NX

Equipped with: 500W, 220V, 50HZ AC motor

Weight: 9KG

Dimensions: 203x89x188mm (length x width x height)
