

Engine Model 6HH1 Air Filter Article Number 4798989 4788991 More Than 15 Years Experience Durable Replacement Part

Our Product Introduction

more products please visit us on nitrogengeneratorsystem.com

Basic Information

- Brand Name: Discount Air Filters You Need
- Certification: ISO90001
- Model Number: 006
- Minimum Order Quantity: 1
- Price: \$10000
- Packaging Details: In Carton
- Delivery Time: The Complete Set Of Equipment Will Be Provided Within 45 Days After Receiving The Advance Payment.
- Payment Terms: 40% Of The Contract Amount Is Prepaid; 60% Of The Contract Amount Is Paid After The Goods Are Inspected And Approved Before Shipment.

Product Specification

- Quality: High-performance
- Oe No: P111098
- Filtration Grade: Hepa Filter
- Dust Holding Capacity: 150 Grams
- Condition: New
- Part Number: AL150288
- Truck Model: Truck And Other
- Engine Model: 6HH1
- Highlight: **6HH1 engine air filter, durable replacement air filter, 4798989 air filter part**

Product Description:

The Air Filter with OE No: P111098 is a meticulously engineered cartridge filter designed to provide exceptional air filtration performance for a wide range of applications. As a product crafted by a custom air filter manufacturer, this air filter stands out for its superior construction, reliability, and efficiency, making it an ideal choice for customers seeking high-quality filtration solutions. Whether for automotive, industrial, or commercial use, this cartridge filter delivers impressive dust holding capacity and durability, ensuring prolonged engine life and optimal operational performance.

One of the defining features of this air filter is its robust construction as a cartridge filter. Cartridge filters are known for their compact design and efficient air flow management, which helps in reducing pressure drop while effectively trapping dust and contaminants. This particular filter utilizes advanced filter media capable of holding up to 150 grams of dust, which significantly extends the service intervals and reduces maintenance frequency. This high dust holding capacity ensures that the filter maintains optimal air quality for longer durations, protecting engines and machinery from harmful particles.

The frame of the Air Filter is crafted from premium aluminium alloy and galvanized iron (GI), which are chosen for their outstanding strength and moisture resistance. The aluminium alloy frame not only contributes to the filter's lightweight nature but also enhances its structural integrity, allowing it to withstand demanding environments without deforming or corroding. The moistureproof properties of both aluminium alloy and GI ensure that the filter remains resilient in damp conditions, preventing rust and prolonging the filter's lifespan. This combination of materials reflects the commitment to quality and durability that is synonymous with all high-quality & American made air filters.

Conditioned as a brand-new product, this air filter guarantees the highest level of cleanliness and performance right out of the box. New filters are critical in maintaining engine efficiency because they provide unrestricted air flow and maximum filtration efficiency, unlike used or refurbished filters which may have compromised media or structural weaknesses. Choosing a new air filter from a trusted custom air filter manufacturer ensures peace of mind and optimal results in every application.

Moreover, this air filter aligns with the standards expected from all high-quality & American made air filters, offering reliable performance backed by superior craftsmanship and stringent quality control. American manufacturing is renowned for precision, durability, and innovation, and this product exemplifies those values. The rigorous manufacturing processes and quality assurance protocols guarantee that each filter meets or exceeds industry standards, providing users with a dependable filtration solution that supports engine longevity and environmental compliance.

In summary, the Air Filter with OE No: P111098 is an excellent cartridge filter that combines advanced filtration technology with durable construction materials such as aluminium alloy and moistureproof GI. Its impressive dust holding capacity of 150 grams ensures prolonged filter life and superior protection against airborne contaminants. As a new product from a reputable custom air filter manufacturer, it embodies the quality and reliability that customers expect from all high-quality & American made air filters. Whether you are replacing an existing filter or outfitting new machinery, this air filter is designed to deliver outstanding performance, durability, and peace of mind for all your air filtration needs.

Technical Parameters:

Article Number	479-8989 478-8991
Condition	New
Quality	High-performance
Size	154*154*247
Truck Model	Truck And Other
Dust Holding Capacity	150 Grams
Material	Activated Carbon And Fiberglass
Scope Of Application	Filter
Part Number	AL150288
Filtration Grade	Hepa Filter

Discover the discount air filters you need from our selection, provided by a trusted custom air filter manufacturer. Our discount air filters you need combine high quality and performance to meet your filtration requirements.

Applications:

The Discount Air Filters You Need brand, model number 006, originating from Suzhou, China, offers a premium solution for various air filtration requirements. Certified with ISO90001, this product guarantees exceptional quality and reliability, making it an ideal choice for diverse application occasions and scenarios. With over 15 years of experience in manufacturing industrial air filtration products, this air filter is designed to meet the highest standards in performance and durability.

This air filter, sized at 154*154*247 mm, is perfectly suited for use in trucks and other heavy-duty vehicles. Its robust frame, made from aluminium alloy, moistureproof and GI materials, ensures long-lasting protection against harsh environmental factors, making it indispensable in industries where clean air circulation is crucial. Whether dealing with dust, pollutants, or other airborne contaminants, this filter provides effective filtration to maintain engine health and operational efficiency.

All high-quality & American made air filters are well-regarded for their reliability, and the Discount Air Filters You Need model 006 proudly stands alongside them, offering a premium industrial air filtration product at a competitive price of \$10,000. Packaged securely in cartons, it ensures safe delivery and easy handling. The complete set of equipment is delivered within 45 days after receiving the advance payment, adhering to strict payment terms of 40% prepaid and 60% post-inspection approval, which reflects the brand's commitment to

customer satisfaction and trust.

This air filter is especially suitable for industrial environments where clean air is critical to maintaining machinery performance and worker health. It can be applied in manufacturing plants, construction sites, and transportation sectors where trucks and other heavy vehicles operate under demanding conditions. Its new, high-quality condition ensures that customers receive a product ready to perform from day one.

In summary, the Discount Air Filters You Need model 006 is an excellent choice for those seeking industrial air filtration products that combine quality, durability, and efficiency. Its versatile application in truck models and other industrial machinery makes it an indispensable component for maintaining optimal performance and air quality standards in various operational scenarios.

Support and Services:

For technical support and services related to your Air Filter product, please refer to the user manual provided with the product for detailed installation and maintenance instructions. Regular replacement of the air filter is recommended to ensure optimal performance and air quality. If you experience any issues or require assistance, our technical support team is available to help diagnose and resolve problems. We also offer extended warranty services and replacement parts to keep your air filtration system operating efficiently. For troubleshooting tips, product registration, and service requests, please visit our official website's support section.

Packing and Shipping:

Our air filters are carefully packaged to ensure they arrive in perfect condition. Each filter is individually wrapped in protective plastic to prevent dust and damage during transit. The wrapped filters are then placed in sturdy, custom-sized boxes that provide additional cushioning and support.

For shipping, we use reliable carriers with tracking options to guarantee timely delivery. Packages are labeled clearly with handling instructions to ensure they are treated with care. Whether you order one filter or in bulk, we prioritize secure packaging and efficient shipping to meet your needs.
