Product Description

Energy Saving Food Preservation High Purity Nitrogen Generator for Packaging Industry

Energy Saving | Food Preservation | High Purity | Packaging Industry

This PSA-N2-120FP is an **energy saving PSA nitrogen generator** delivering **high purity food-grade nitrogen (99.9%)** for the packaging industry. It supports food preservation through modified atmosphere packaging (MAP) - displacing oxygen to extend shelf life, preserve freshness, color and flavor - while consuming minimal energy per Nm³ of nitrogen produced.

Key Selling Points

Energy Saving Design: High-efficiency carbon molecular sieve and optimized adsorption cycle reduce power consumption by up to 30%.

Food Preservation: High purity nitrogen for MAP packaging extends shelf life of snacks, fresh produce, meat, dairy and baked goods.

High Purity Output: Stable 99.9% food-grade nitrogen, dry and oil-free, safe for direct food contact packaging.

Packaging Industry Focus: Flow rate 120 Nm³/h matched to packaging line consumption for continuous, uninterrupted operation.

Cost Effective: On-site generation cuts nitrogen cost versus cylinder or liquid nitrogen supply.

Reliable Operation: PLC automatic control, purity monitoring and low maintenance design.
